SUMMARY

I am a driven and detail-oriented Full-Stack Javascript Developer transitioning from a background in television production and hospitality. While completing a diploma in Marketing Management in 2019, I discovered a passion for programming and all things marketing automation. I excel in collaborative environments and look forward to joining a new team and creating great software.

SKILLS

Languages: Javascript, Ruby, HTML & CSS
Frameworks & Libraries: NodeJS, ReactJS, Rails, Ajax, EJS, jQuery, Express, Bootstrap & Tachyons
Systems, CMS & Databases: PostgreSQL, Wordpress, Git, Heroku & Netlify
Testing: Mocha, Chai, Storybook, Jest & Cypress

PROJECTS

Scheduler (repo)

An Interview Scheduler App where a user can book and manage an interview with an instructor.
Tech Stack: ReactJS, PostgreSQL, Axios, WebSockets, Storybook, Jest & Cypress

Tweeter (repo)

A simple Twitter clone.
Tech Stack: Express, jQuery, JS & EJS.

Mood4Food (repo)

A food ordering app (team project). After an order is placed, the restaurant & user are updated of order status via text message and preparation time is dynamically rendered on the confirmation page.
Tech Stack: Twilio, Express, JS, EJS, PostgreSQL, Bootstrap & jQuery.

Tinyapp (repo)

A URL shortening app.
Tech Stack: Express, JS, jQuery, Ajax, Bootstrap & EJS.
